DIMITRI NAKOS

Full Stack Web Developer

PROJECTS

Dev Connect
https://secret-refuge-67245.herokuapp.com/

Created an application using React to allow boot camp developers to connect, communicate, and offer assistance to peers.

- Lead the design and creation of the third and final project for UNC Charlotte's Full Stack Web Development.
- Utilized Socket.io to allow real time change of application components between users.
- Worked with React, MongoDB, AuthO npm, bCrypt, Material CSS, and axios.
- Created in a Fast-paced environment while learning a new technology.

Retro Backlog
https://cryptic-reaches-66396.herokuapp.com/

Personal Application using Handlebars, MySql, and JavaScript to track a growing backlog of Video Games.

- Front-end focused design to test out a new CSS framework.
- Created to build an understanding of MySQL and maintain a consistent list.
- Utilized Node.js for express pathing and CRUD methods to interact with the MySQL database, Handlebars for HTML templating, and JavaScript to create a personal tracker.

Trail Weather Tracker
https://diminako.github.io/trail-weather-tracker/

An application created to work with 3rd party APIs, jQuery, JavaScript, and Bootstrap.

- Created an app that used open source API to interact with UI and give users information based on their inputs.
- Elected team leader of the first project in a remote boot camp situation. Encouraged a collaborating effort with team members using effective interpersonal communication and active listening skills.
- Provided team members with data from the APIs and directed them on ways to use the information to be displayed for an improved UX design.

EDUCATION

University of North Carolina at Charlotte

Certificate in Full Stack Web Development, 2020-2021,   A+

- Full Stack boot camp with a focus on HTML/CSS, JavaScript, MySQL, MongoDB, MVC organization, Node.js, and React.
- Collaborated remotely with other developers to translate requirements into polished, high-level designs.
- Tutored fellow classmates on topics they struggled to grasp and helped them achieve a better understanding and succeed.
- Demonstrated ability to adapt and pivot in a fast-paced, agile environment while learning new tools and technologies.

University of North Carolina at Charlotte

Associates of the Arts, History 2017

- Graduated with a GPA of 3.80.
- Learned how to research effectively and explain complex topics .

WORK HISTORY

Diagnostic Volkswagen Technician, Keffer Volkswagen

December 2016 - November 2020

- Diagnose modular computer systems and perform software updates.
- Achieved a 98% first time fix rate over the course of my career.
- Helped Keffer Volkswagen become a Top 3 dealership in the South East region by creating a pleasurable customer experience.
- Mentored a team of junior technicians and led to successful growth of that group and business success.
- Generated 175k in revenue per year.

Volkswagen Technician, Carolina Volkswagen

April 2010 - December 2016

- Coordinated group brainstorming for difficult diagnosis.
- Troubleshoot and problem solve issues with emerging automotive technologies.
- Utilize web based training and information.
- Trained new technicians starting out in the field.
- Started from 0 experience to become one of the top technicians in the service department within a year.
